COLLOIDS AND SURFACES A

Subject Index

Adhesion, 215
Adsorbents, 89
Adsorption, 39, 89, 145, 315
Adsorption kinetics, 225
Adsorption layer thickness, 225
Adsorption of humic acid onto soluble oxides, 281
Aggregation behaviour, 303
Air/solution interface, 315
Alkali halides, 77
Alkali metal ions, 33
Amylopectin, 145
Amylose, 145
Aphron, 119
Axisymmetric Drop Shape Analysis, 231

Bilayer membranes, 257
Bioregulatory agent, 1
Branching, 45
1-Bromo-4-tridecylpyridine, 137

Capacity, 39
Captive bubbles, 231
Colloidal liquid aphron, 119
Colloids, 109
Contact angle, 215, 265
Copolymerization, 303
Crown-ether styryl dye, 325

Differential scanning calorimetry, 119
Dilute, 109
Dilute suspension, 69
Dissociation constants, 19
DPPA, 325
Dynamics, 257

Electrical hetero-interaction, 51
Electrolytic plating, 173
Electrophoretic mobility, 19
Ethylcellulose latex, 95

Film collapse, 231
Flotation, 265
Flow improver, 181
Forces between dissimilar surfaces, 77

Gold, 109
Gold electrode, 39

High-internal-phase-ratio emulsion, 119
High ionic strength, 77
Humic acid analogue, 281
Hybrid colloidal particles, 271
Hydration forces, 77
Hydrodynamic interaction, 69
Hydrodynamic theory, 257
Hydrolysis, 63
Hydrosol, 63

Induction time, 225
Interaction, 89
Inverse gas chromatography, 161
Ion-exchange selectivity, 33
Ionic selectivity, 325
Iron(III) antimonate, 33

Kaolin, 145

Langmuir wetting, 215
Latex, 109
Lipid membrane, 19
Long-chain aliphatic alcohols, 39
Low frequency dielectric dispersion, 95
Lung surfactant, 231

Membrane, 109
Membrane–solution systems, 257
Mercury, 315
Metal ferrocyanides, 89
Micellar solutions, 137
Microemulsions, 45
Molecular unfolding, 225

Monolayers, 325
Montmorillonite, 69
Mutual enhancement of adsorption oscillations of ordinary and additional counterions, 95

Nanosized dispersions, 173
Nernst potentials, 51
Nitric Oxide, 1

Oxide stabilization by humic acid, 281

Partitioning, 45
PdS, 173
Photocatalytic reduction, 271
Poisson–Boltzmann equation, 51
Polymerizable cationic surfactant, 303
Protein adsorption, 225

Removal, 89
Rheological behavior, 181

Sediment volume, 69
Serine, 315
Silica and mullite syntheses, 161
Small-angle neutron scattering, 137
Sol–gel method, 161
Spin-lattice relaxation rates, 1
Squeeze-out, 231
Stability, 63, 119
Stability of colloids, 51
Starch derivatives, 145
Substituted phenols, 89
Surface characteristics, 161
Surface modification, 271
Surface plasmon, 271
Surface potential, 19
Surface tension, 137, 231
Surfactant, 265
Surfactants, 45

Thixotropy, 181
Three-phase contact, 265
Tin(IV) antimonate, 33
Titanium dioxide, 63
Titanium tetraethoxide, 63
Transmission electron microscopy, 119
TRFQ, 303
Tyrosine, 315

Ultrafiltration, 109

Viscometry, 303
Viscosity, 69

Waxy crudes, 181
Wettability, 265

Zetametry, 161
